3. Claim 18 (amended): A system for use in achieving distributed data storage over a computer network comprising:

a storage server system comprising one or more storage servers that each comprise a data storage device and a network interface for communicating with one or more application clients that will require data storage and at least one management storage server; and

a management server system comprising one or more management storage servers that each comprise a network interface for communicating with an application client and each of said storage servers;

each of said management servers and each of said data storage servers comprising a data storage configuration identifier whose value is indicative of an allocation of data storage within said storage server system at a point in time, the allocation of data storage within said storage server system comprising one or more
